DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 32 - 62 are considered allowable since when reading the claims in light of the specification (MPEP § 211.01) or *In re Sneed*, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 32 including "summarizing and storing each program segment into a corresponding summary segment and generating metadata files for delimiting a beginning and an end of summary segments and program segments;" and "upon a request from a user from a client device, supplying the summary segments in lieu of program segments, the summary segments being streamed in a first channel to the client device and the program segments being streamed in a second channel to the client device", and independent claim 50 including "generating summary segments of parts of the program segments and generating summary index markers corresponding to the programming index markers" and "generating metadata files for delimiting a beginning and an end of summary and the program segments and including indexing

information for facilitating links between the program segments and the summary segments, wherein the metadata files are used to deliver summary segments to the recipient, the summary segments being streamed in a first channel to the client device and the program segment being streamed in a second channel to the client device.”

The closest prior art (Sezan, USPN 6236395), teaches program views may contain a set of fields that contain data for the identification of key frames, segment definitions between shots, highlight definitions, video summary definitions and so on. Rui teaches that various "pre-generated" summaries may be generated and maintained by remote servers and pre-generating summaries, if a user requests a 15-minute summary. None of the references of record alone or in combination disclose summarizing and storing each program segment into a corresponding summary segment and generating metadata files for delimiting a beginning and an end of summary segments and program segments and upon a request from a user from a client device, supplying the summary segments in lieu of program segments, the summary segments being streamed in a first channel to the client device and the program segments being streamed in a second channel to the client device cited by claim 32 and generating metadata files

for delimiting a beginning and an end of summary and the program segments and including indexing information for facilitating links between the program segments and the summary segments, wherein the metadata files are used to deliver summary segments to the recipient, the summary segments being streamed in a first channel to the client device and the program segment being streamed in a second channel to the client device cited by claim 50.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
